Authors:

Carina Coulacoglou is a test developer and the founder of the Projective Fairy Tale Test Society. The Fairy Tale Test is a comprehensive personality test for children that has been standardized in several cultures and is published in 13 languages. She has taught courses on child development and psychological assessment at the University of La Verne, the Mediterranean College and Pantion University of Athens. She has published several articles and books.

Donald Saklofske is a Professor at the University of Calgary, and Adjunct Professor at the University of Saskatchewan and Swinburne University, Australia. He is a Fellow of the Canadian Psychological Association and the Association for Psychological Science. He is the Editor of the *Journal of Psychoeducational Assessment* and the *Canadian Journal of School Psychology* and Associate Editor of *Personality and Individual Differences*.

Psychometrics and Psychological Assessment Principles and Applications

Carina Coulacoglou and Donald H. Saklofske

Psychometrics and Psychological Assessment: Principles and Applications allows researchers and clinicians to understand how tests are developed and standardized for use for different purposes and populations as well as how to create new assessment measures. The book covers intelligence scales, self-report inventories, projective techniques, interests and values, neuropsychological, forensic and industrial/organizational assessment as well as clinical assessment.

KEY FEATURES

- Discusses extensively, and on an advanced level, major psychometric issues in combination with empirical studies
- Evaluates multiple cognitive perspectives on neurodevelopmental disorders
- Examines the family context in relation to children's behavioral outcomes
- Features major personality measures as well as their cross cultural variations
- Introduces developments in psychopathology and psychiatric taxonomies
- Highlights the importance of assessing coping and resilience in both personality and psychopathology
- Examines the precursors of aggression and violence and presents a variety of measures for their prediction and prevention
